

✕ Add Firebase to your Android app

Register app

Android package name: es.esi.techlab.data_crowslector, app nickname: Data Crowslector

2

Download config file

📄 Download google-services.json

Switch to the **Project** view in Android Studio to see your project root directory.

Move the google-services.json file that you just downloaded into your Android app module root directory.

google-services.json

Previous

Next

3

Add Firebase SDK

4

Run your app to verify installation
